

INFORMATION SHEET

Disinfectant Dispenser

INTENDED USE:

The dispenser is designed to disinfect hands with disinfectant. Stainless steel case ensures durability and long life of the product. The fluid container is made of certified plastic for contact with disinfectants and is suitable for refilling. It is available for two volumes: 500 ml and 1000 ml. The dispenser is designed for wall mounting.

HOW TO USE:

The dispensing of the fluid is performed using a large and ergonomic elbow handle. The transparent container allows easy control of the disinfectant amount. The dispenser is very simple to install and easy to maintain and use. Its universal and attractive design allows the dispenser to be integrated into any room.
